[•] At the time this final provincia report went to press, Presidential Degre. No. 418 was issued (March 20 1974) reconstituting the Bureau of the Census and Statistics in > 2 new office under the administratrative supervission of the National Economic and Development. Authority,

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Populatior and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fartility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explantory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970 the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

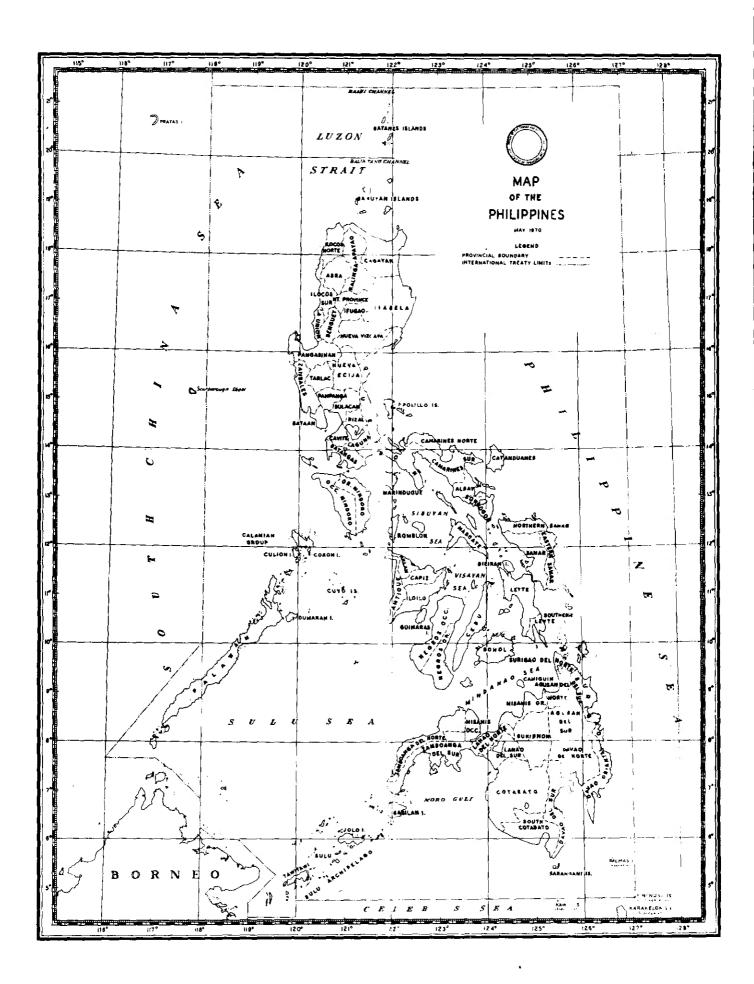

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and coor eration of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines April, 1974

Part I - POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employes, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of Fil pino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council, Presidential Economic Staff; Department of Lation; Regional Urban Planning Office; People's Homesite and Houring Corporation Department of Health; Department of National Defense; National Science Development Board; Commission in National Integration: Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Judget Commission, Philippine Statistical Association; Institute of Planning and the Alian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-incharge who supervised the field operations, assisted by welltroined central office personnel. For the entire country, there were 2,297 public school principal teachers design ited as supervisors, and 66,722 public school reachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was creoted by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive secretary as Chairman and the ecretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense. Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCE at the local government level, there were also established Provertial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumer trian.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highwa is Engineer, PC Frovincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist, as members.

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for evermarried women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample hot schoold schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

This provincial report is presented in four (4 parts and comprises fifty-nine (59) tables, as follows:

	No.	of Tables
Number of inhabitants		6
Economic characteristics		20
Social characteristics		19
Marital status	. 3	
Education and literacy	. 7	
Citizenship	_	
Mother tongue		
Ability to speak Pilipino, English		
and Spanish	. 2	
Religion		
Demographic characteristics		14
Fertility		
Migration		

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same

The coverage of the population enumerated in the census and the size of the sample are shown below

Topic	† Table † Coverage † No. †	Size of sample (percent)
1. Number of Inhabitants	4 1-5 4 Household and inst population 6 Household populat	100

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- In their entirety all cities and municipalities having a population density of at least 1,000 persons per square kilcmeter.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in Land II), regardless of the population size, which have the following:
 - Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments [commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/ fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.

II. For all other cities and municipatities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.

III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.

All other poblaciones having a population of at least
 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sit as barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the cell us. As a rule, it is the place where he lives and sleeps most of the time.

HC197\$EHOLD

Joually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the prestaration and consumption of folid. However, a person living aic in a distinct dwelling unit is considered as one separate ho whold. In most cases, a how shold consists of a related far or group. In some instances, these generations may be found like together in one household. Some household members had have no relationship to the central group—boarders and ser ints, for example—but they are counted as part of the household fithey eat and sleep of at least sleep in the same dwicing unit.

* "lodger" (who rents a room a space) is grouped with the how whold from whom he rents his atom or space unless he has sep atte cooking facilities and a different entrance.

most cases, a household may be taken to be the entire gro; of persons who customarily sleep in one dwelling unit. An exc of tion, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of pousing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

tese include persons in militar i installations, correctional and i enai institutions, dormitories i schools and universities, has talls, religious institutions and the like.

HEAD OF HOUSEHOLD

the head of household is the per on who generally provides the crief source of income for the household unit. He is the adult person male or female, who is responsible for the organization and time of the household or who is regarded as such by the numbers of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

The determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, sonar aw, daughter-in-law, grandchild, other relatives (niece, nephres, aunt, uncle, etc.), not related rembers (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

SPECIAL AREAS

This a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 - 1. on vacation;
 - 2. on business;
 - 3. schooling below college level;
 - confined in a hospital, if confinement is not mo e than six months;
 - in the Armed Forces, if their absence is not more than six months;
 - in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and damestics who live with the household, or at least sleep in the same unit;
- Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the **conjugal** family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. Single denotes c person who has never been married.
- b. Married denotes a person legally married, either living together with spouse at the time of the census or temporarily separated cwing to work, illness, or service in the Armed forces or a person who lives with someone as man and wife, whether legally married or not.
- c. Widowed denotes a married person whose spouse died and up to the census taking has not remarried.
- d. Separated denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. Divorced denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a waman first entered married life or her first consensual urion (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil eremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (longo-Visayan), Isocano, Bicol, Samar-Leyte, Pampango and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, intant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born, whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertise in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years ald and over who, during the preceding week of enumeration, were either

- (a) working for pay or for profit or without pay in the family farm or enterprise, or
- (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and o who are not classified as employed or unemployed. Persons rot economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who coes housekeeping chores in one's house such as cooking, cleaning the house, and laundering for tamily members of the household. This does not include work around the house as painting one's touse, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STL DENT

A student is a person enrolled in a school or codege and is not considered economically active during the week prior to his entimeration. A working student it classified as "economically active" rather than "student" even though he spends more time in school than in his work.

O"HERS

"Others" may include person-doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fending the yard, etc., in their own homes.

CLASS OF WORKER

- (1) The allocation of a person to a particular class of worker ategory is basically independent of the occupation or industry in which he works.
- (2) The class of worker information refers to the same job described in the occupation and industry columns. The classification by class of worker consists at the following categories:
 - 1. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employee—working for government or government owned or controlled corporations.

2. Own business

- (a) Self-employed—working in one's business, farm, profession, or trade for profit or fee, without paid employees.
- (b) Employer—working n one's business farm, profession or trade for profit or fee, with one or more paid employees.
- (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or accupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physican, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II - HOUSING

INTRODUCTION

The Census of Housing was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The Census of Housing is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a buliding serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	A. Characteristics of building
1	Type of building or house
2	Number of dwelling units in building or house: occupied-ur occupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit
6	Number of rooms
7	Number of households and persons occupying
	dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

th accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

- Single house—a complete structure intended for a single family or household.
- Duplex— a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
- Apartment or accesoric—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesoria is one or two-floor structure divided into several
- dwelling units, each dwelling unit having its own separate entrance from outside.
- Barong-Barong—a shack or makeshift shelter, usually built with light materials.
- 5. Commercial—a building used for trade and commerce such as a store or an office building.
- Industrial—a building used for processing or manufacturing, such as a factory plant.
- Agricultural—any structure used for agriculture purposes, such as barn, warehouse, etc.
- 8. Institutional—a hospital, school, church, etc.
- Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or privateresidences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

- . Galvanized iron, including aluminum and fiberalass
- Asbestos
- 3. Concrete, tile
- 4. Cogon
- 5. Nipa, anahaw, buri
- 5. Others (canvas, salvaged materials, billboards

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wal' are:

- 1 Concrete, including hollow blocks, adobe stone, bricks, etc.
- 2. Galvanized iron, including aluminum
- 3. Wood, including plywood
- 4. Bamboo, including sawali
- 5. Nipa, anahaw, buri
- Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining toom, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, pathrooms and tailets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this ciwelling unit.

TYPE OF TENURE

The type of tenure may be any of the following:

- Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
- Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
- 3 Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
- 4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
- Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
- Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
- Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
- 8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SET

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working oraer and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

- 1. Electricity—from whatever source of power unit
- 2. Kerosene (gaas)—liquid form
- Gas (liquefied petroleum)—piped or in cylinder (Esso Gasul, Rockgas, Shellane, Manila Gas, etc.)
- 4. Wood, including sawdust
- 5. Charcoal
- Others—any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The type of lighting are:

- 1. Electricity—from whatever source of power unit
- 2. Kerosene (gaas)—whatever the nature of lamp used
- 3. Oil—any kind of vegetable (animal) oil other than kerosene
- Others—any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

- 1. Piped water system (Municipal, NAWASA)
- 2. Artesian well
- 3. Pump
- 4. Open well
- 5. Spring
- 6. Rain water
- 7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

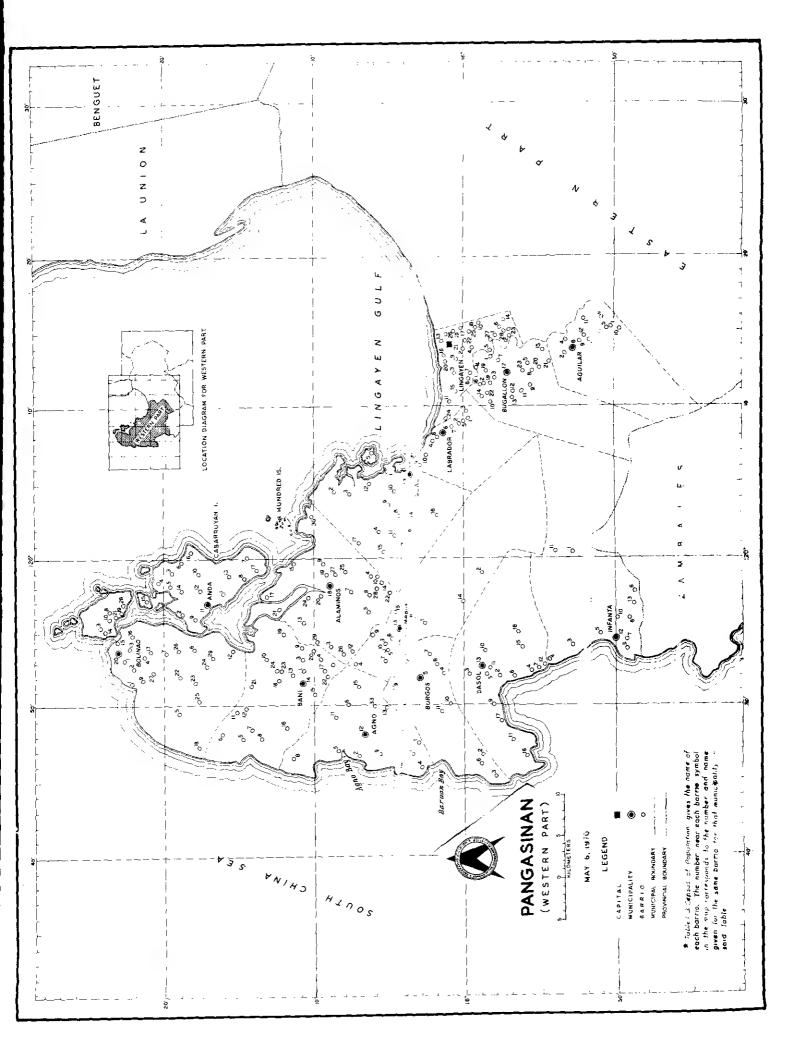

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

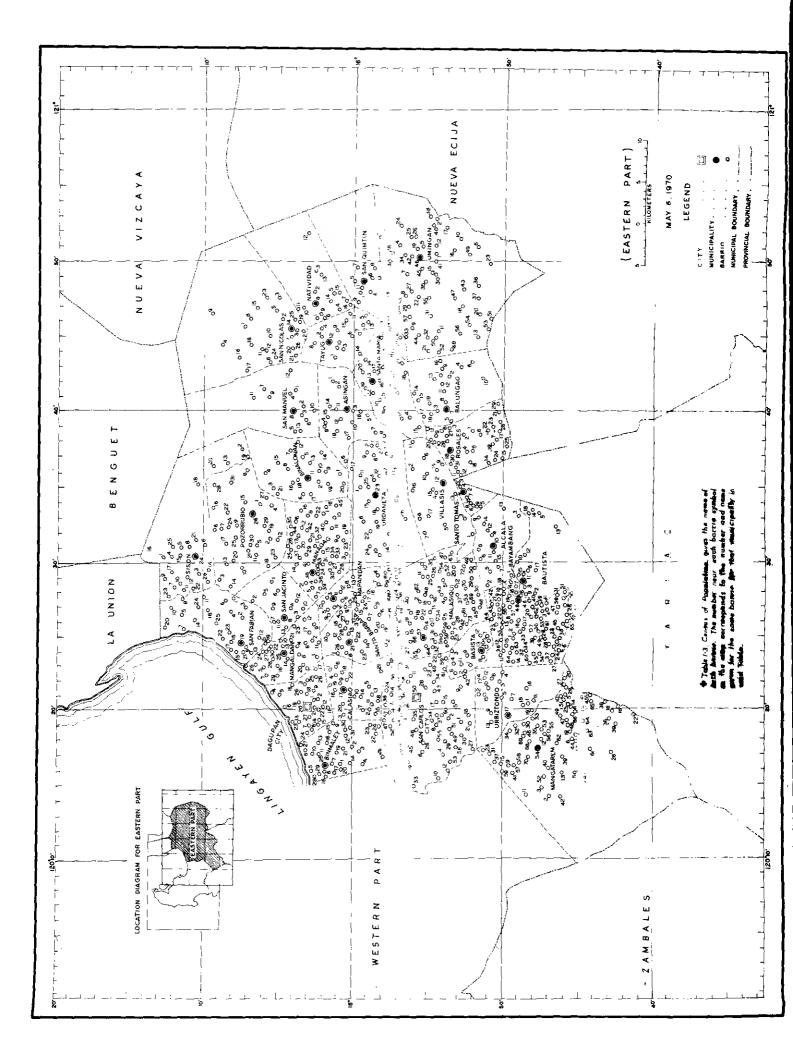

Flush system/water-sealed—Water-sealed toilet is that
type where after water is flushed or poured into the bowl
a small amount is left in the bowl which seals its bottom
from the pipe leading to the depository. In effect, the
flush toilet is one type of water-sealed toilet.

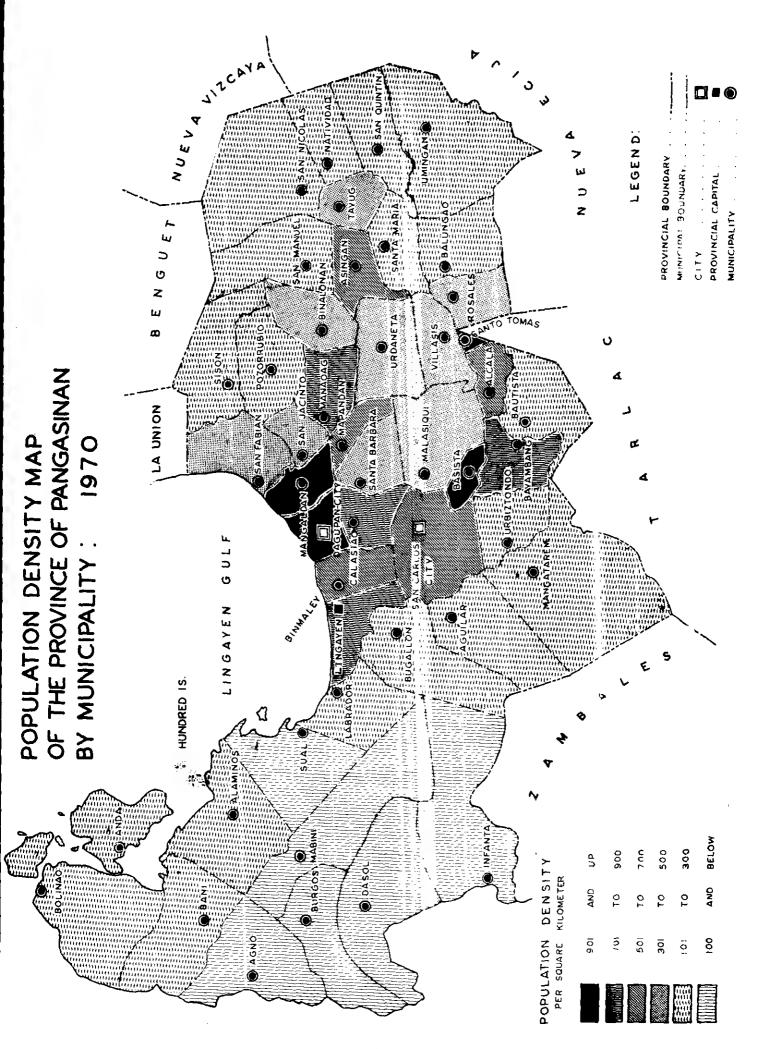

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipina tailer habits

- Antipolo system or closed pit—is a type of toilet wherein water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
- 3. Open pit system—is a pit which is entirely open or parth covered.
- Public toilet—is any type of toilet for communal use.

INTRODUCTION

The province of Pangasinan occupies the northern portion of the vast central plains of Luzon. It has for its boundaries Lingayen Gulf, La Union and Benguet in the north, Nueva Vizcaya in the northeast, Nueva Ecija in the east, Tarlac in the south, and Zambales and the China Sea in the west. Its sprawling ricefields and other cultivated areas extend from the foot of the Caraballo Mountains to Nueva Ecija and Tarlac.

Pangasinan may be divided geographically into two parts: the northwestern portion bordering Lingayen Gulf and the China Sea, and the central and eastern portions where the sprawing ricefields are located. The eastern portion is part of the Central Luzon Plains.

Created a province in 1611, Pangasinan once included northern Tarlac and southern La Union, while its western boundary extended only up to the Zambales mountains. In 1903, however, the northern portion of Zambales was annexed to Pangasiran. This included the towns of Agno, Alaminos, Anda, Bani, Bolinao, Infanta and San Isidro. However, it also lost Santo Tomas to La Union and suffered vast territorial loss which included Cami ing to Tarlac. Pangasinan is presently composed of 2 cities and 45 municipalities, with the municipality of Lingayen as the provincial capital.

LAND AREA AND POPULATION

The provincial territory covers a land area of 5,368.2 square kilometers or 1.7 percent of the total Philippine area. Almost all of its population of 1,386,143 are native born, with the foreign born comprising only 0.1 percent (Table 1-6). Ranking fourth most populous province in the 19,70 Census, Pangasinan had a population count of 1,124,144 in 1960. In the Census of 1960 it ranked sixth in population size. The males are slightly cut-numbered by the females, with a ratio of 98 males for every 100 females. The province has a comparatively high density. Among the 67 provinces, it ranks tenth in population density. Its density of 258.2 persons per square kilometer is way above the national average (122.3) by 135.9.

From 1960 to 1970 the Philippine population increased by 35.4 percent, while the population of the province increased by 23.3 percent. The population of Pangasinan grew at a slower rate than that of the Philippines, which recorded an annual growth rate of 3.01 percent, in contrast to the former's growth rate of 2.07 percent. It ranks number 42 in the rate of population growth between 1960 and 1970.

URBAN-RURAL RESIDENCE

The province is predominantly rural, with only 19.7 percent of its population living in urban areas. Compared to 31.8 percent for the whole country, the extent of urbanization in Pangasinan is below the national average by 12.1 percent. The population structure in the urban as well as in the urral areas is slightly dominated by the females who make up 51.8 percent of the urban population and 50.3 percent of the rural population. Correspondingly, the males comprise 48.2 percent of the urban population and 49.7 percent of the rural population (Table 1-4).

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

Pangasinan has 234,055 households, each composed of an average number of 5.9 persons, and 251,560 family nuclei. The average number of persons per family nucleus is 5.5 (Table 1-3).

AGE COMPOSITION

The proportion of the youth population in the province is slightly higher than the youth population of the entire country. While the Philippines has 43.1 percent of its population in the age group 0.14 Pangasinan has 44.6 percent of its population in the same age group. However, the country has a higher proportion (53.4%) of its population in age group 15-64 than the province, which has only 51.4 percent in this age bracket. In the older age group (65 and over) the proportion is quite close between the Philippines (3.5%) and the province (4.0%) (Table 1-4). The median age of the population which is 16.3, is only 1.1 years lower than that for the Philippines which is 17.4 years.

The population in the rural areas is younger than in the urban areas. In the rura areas 45.2 percent of the population fall under the age group 0.14, whereas in the urban areas only 42.1 percent of the population belong to the same age group. However, the reverse is true in the productive ages (15-64) and in the older age bracket (65 and over), where the urban areas have a higher percentage of the population in both categories than the rural areas. Of the urban population, 53.7 percent are in the age group 15-64 and 4.2 percent in age group 65 and over, compared to 50.9 percent and 3.9 percent, respectively, of the rural population. The dependency ratio in Pangasinan (94) is higher than that for the Philippines (87). For every 100 persons in the productive ages there are 94 "dependents" in the province. The ratio is higher in the rural areas (97) but lower in the urban areas, which is only 86 (Table 1-4).

ECONOMICALLY ACTIVE POPULATION

Close to 968 thousand or 69.8 percent of the total population are 10 years of age and over. Of this number, less than half (41.6%) are economically active, while 58.3 percent are not economically active. A greater percentage of the economically active populace are employed (88.4%) with the unemployed constituting only 11.6 percent. About 6.6 percent are seeking work for the first time. In the not economically active category 49.1 percent are housekeepers, 1.4 percent are students, and 39.5 percent fall under "others" (Table II-1).

CLASS OF WORKER

There are 376,166 experienced workers in the province, of which 32.3 percent are wage and salary workers, 46.1 percent have their own business, and 16.4 percent are unpaid family workers. Of the wage and salary workers, 29.6 percent are in the employ of the private sector and 7.7 percent, in the government service (Table II-3).

INDUSTRY

Basically agricultural Pangasinan has more than half, or 51.1 percent, of the economically active population in agriculture, hunting, forestry and fishing. Only 15.4 percent are in services, 12.4 percent in manufacturing, 8.1 percent in commerce, 5.6 percent in construction, 4.8 percent in transport (Table 11-6).

Of those engaged in agriculture, 88.1 percent are males. Almost one-fifth, or 19.3 percent, of the total female economically active population are working in agriculture while about three-fifths, or 59.5 percent, of the total male economically active population are engaged in the same industrial activities. (Table II-1).

OCCUPATION

Classified by occupation, 50.9 percent of the economically active populace are farmers, fishermen, hunters and loggers, while 17.0 percent are craftsmen, production process workers and laborers. The sales workers constitute 8.0 percent, followed by service workers with 6.6 percent, professional, technical and related workers, 6.3 percent, and workers in transport 4.9 percent (Table II-12).

NUMBER OF HOURS WORKED

During the reference period 43.7 percent of the employed workers in Pangasinan worked for 45 hours and over, while 33.0 percent worked for 35 to 44 hours. Only 10.7 percent worked for 25 to 34 hours, 10.2 percent, for 15 to 24 hours, and 2.3 percent, less than 15 hours (Table II-15).

USUAL OCCUPATION

By usual occupation for the last twelve months, 53.3 percent were farmers, fishermen, hunters and loggers; 15.2 percent, craftsmen, production process workers and laborers; 7.1 percent, professional, technical and related workers; 6.9 percent, sales workers; 6.4 percent, service workers; and 4.9 percent, workers in transport. Put together, the other occupation groups comprised only 6.2 percent (Table II-19).

MARITAL STATUS

Of the population ten years and over, the proportion between the "married" and the "never married" is nearly equal, with the latter having slight edge over the former. The "never married" group comprise 47.9 percent, while the "married" constitute 46.9 percent. About 4.7 percent are in the "widowed" category and 0.4 percent, either divorced or separated. More males are single (50.3%) than married (47.0%). Among the females, the proportion is almost equal, with the "married" comprising 46.8 percent and the "never married", 45.8 percent. However, there is a higher proportion of "widowed" among the females (6.8%) than among the males (2.4%) (Table III-1).

LITERACY AND EDUCATION

More than three-fourths, or 79.3 percent, of the population 6 years old and over are literate or "know how to read and write". The urban areas have a higher literacy rate, with 84.8 percent, in comparison to 77.9 percent for the rural areas (Table III-4).

More than 58 percent of the 495,706 persons aged 25 and over have completed elementary education. Only 15.3 percent have completed high school education and 8.3 percent, college, while 17.9 percent have not completed any grade at all (Table III-6). Out of 1,128,329 persons 6 years old and over, 30.9 percent are attending school. More than two-thirds (69.1%) are out of school. About 54 percent of the population in the 6-24 year age group are attending school. More males (51.3%) than females (48.7%) are attending school in this age bracket (Table (III-9).

HOLDERS OF COLLEGE DEGREE

Pangasinan has 38,600 professionals. Of this number, 23,209 or 60.1 percent are in the field of Education. The Social Sciences, under which Commerce is classified, make up only 15.9 percent; the Medical Sciences, 7.1 percent; Engineering, 49. percent; Law, 3.5 percent; and the Humanities, 2.4 percent. Only 1.7 percent are in Agriculture; 0.5 percent in Fine Arts; and 0.2 percent in Natural Sciences, while 3.7 percent did not specify the courses taken in college (Table III-10).

DIALECT

The principal dialects spoken in the province are Pangasinan and Iloco. Of the total population 691,156, or 49.8 percent, speak Pangasinan, while 641,331 or 46.3 percent speak Iloco. The rest (3.9%) are distributed among the thirty-one minor dialects spoken in the province (Table III-13).

In the 1960 Census more people in Pangasinan could speak English than Pilipino (Tagalog); 47 0 percent of its population could speak English and only 42.2 percent could speak Pilipino. Today the reverse is true with 55.1 percent of the population able to speak Pilipino and only 52.4 percent able to speak English (Table III-16).

RELIGION

The people of Pangasinan are predominantly Roman Catholics; 932,804 or 84.1 percent of the population are followers of Roman Catholicism. The Aglipayan constitute only 8.0 percent; the Protestants, 2.9 percent; and the Iglesia ni Cristo 1.9 percent. The remaining 3.1 percent belong 10 some other religions (Table III 19).

FERTILITY

On the average 5.4 children are born alive to ever-married women in the province who have reached the end of thier child-bearing period (50 years and over). The average number is slightly higher (5.5) in the rural areas than in the urban areas, which is only 5.0. About 7.6 percent of the 90,742 ever-married women have had no children by the end of their reproductive years. The proportion is slightly higher in the urban areas, with 7° percent than in the rural areas, which is 7.5 percent.

The average number of children born alive to an evermatried woman who has already horne at least one child is 4.7. The average number is almost the same for the urban areas (4.6) and the rural areas (4.7) (Table IV-1).

Majority of the ever-married women in Pangasinan married early. More than half (56.0%) of the 289,673 ever-married women were married by the age of 20, and over-four-fifths, or 86.1 percent, were married by age 25 (Table IV-7).

MIGRATION

Nearly nine-tenths of the total population of the province are residents of the same municipality in which they were born; 7.1 percent were born in municipalities other than their place of residence, but in the same province and 4.5 percent were born in other provinces (Table IV-9).

Comprising the population 10 years of age and over are 368,606 persons, 92.6 percent of which reside in the same muticipality where they resided in 1960. Only 3.7 percent were iving in other municipalities with nother province of Pangasinan in 1960, while 3.5 percent were residing in other provinces (Table tV-11).

NUMBER OF DWELLING UNITS

Pangasinan province has 230,600 dwelling units, 228,309, or 99.0 percent, of which are accupied and only 2,391 or 1.0 percent are unoccupied (Table 1). Of the total number of dwelling units, 212,901, or 92.3 percent, are single houses, 12,910, or 5.6 percent, are "barong-barong" structures 2,287, or 1.0 percent, are duplex structures, and 967, or 0.4 percent, are commercial buildings.

There are more dwelling units in the rural areas than in the urban areas. Of the 230,700 dwelling units, 187,418, or 81.2 percent, are found in the rural areas and 43,282, or 18.8 percent, are found in the urban areas.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

Of the total number of dwelling units in the province, 100,274, or 43.4 percent, are found in structures with roof of strong materials (aluminum, galvanized iron, asbestos, tile or concrete) and 127,917, or 55.5 percent, are found in structures with roof of light materials, that is, of nipa or cogon (Table 2).

In the urban areas 25,958, or 60.0 percent, of the dwelling units are found in structures with roof made of strong materials and 17,069, or 39.4 percent, in structures with roof made of light materials. In the rural areas 74,316, or 39.7 percent, of the dwelling units are in structures with roof made of strong materials and 110,848, or 59.1 percent, in structures made of light materials.

By type of construction materials of wall, 37.2 percent of the dwelling units are in structures with walls made of strong materials, and 48.9 percent with walls made of light materials (Table 2). In the urban areas 62.8 percent are in structures with walls made of strong materials, and 30.9 percent with walls made of light materials (Table 2). In the rural areas, 55.0 percent are in structures with walls of light materials and 31.3 percent are in structures with walls of strong materials.

TYPE OF TENURE

Of the 228,309 occupied dwelling units in the province, the owner-occupied dwelling units (including owned and a part rented out, and owned and a part occupied free by others) constitute 96.8 percent, while the rented only, rented and part rented out and rented and part occupied free comprise only 1.6 percent. Dwelling units occupied rent-free also make up 1.6 percent (Table 3).

Most of the dwelling units in both the urban (89.5%) and the rural (98.6%) areas are owner-occupied only, owned and a part rented out, and owned and a part occupied free by others. Rented dwelling units in the urban areas (7.4%) comprise a greater percentage than those in the rural areas (0.2%).

YEAR CONSTRUCTION

By period of building construction, 43.0 percent of the structures where dwelling units are found were built during 1965-1970; 35.5 percent during 1955-1964; and 14.9 percent during 1945-1954. Only 2.0 percent were constructed during 1942-1944 and 4.6 percent before World War II (Table 4).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

In most cases (95.3%), one dwelling unit is occupied by one household (Table 5). Only 4.0 percent of the dwelling units are occupied by two households. In the urban areas 91.9 percent of the dwelling units contain one household, while in the rural areas, 96.1 percent. Dwelling units occupied by two households comprise 6.4 percent in the urban areas and 3.5 percent in the rural areas.

NUMBER OF ROOMS

According to the number of rooms, 27.7 percent of the dwelling units have only one room; 31.8 percent, 2 rooms; 21.1 per-

cent, 3 rooms; 11.2 percent, 4 rooms; 4.6 percent, 5 rooms; 2.0 percent, 6 rooms; 0.9 percent, 7 rooms; and 0.7 percent, 8 or more (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERA

Of the 234.055 total number of households, 58.0 percent have radios; 1.7 percent have television sets, and 2.7 percent have refrigerators (Table 9). Out of the 44,389 urban households, 66.6 percent have radios, 6.0 percent have television sets, and 10.0 percent have refrigerators. Of the 189,666 rural households, 56.0 percent have radios 0.7 percent have television sets, and 1.0 percent have refrigerators.

LIGHTING FACILITIES

Kerosene is the most common type of lighting used in the province with 82.7 percent of the total number of households using it (Table 11). Only 16.1 percent use electricity. In the urban areas 49.7 percent of the households use electricity and in the rural areas only 8.2 percent. In the rural areas most of the households (90.6%) use kerosene, while in the urban areas 49.1 percent use it.

WATER SUPPLY

Of the total households, 68.6 percent use the pump, 13.2 percent use the artesian well, 10.8 percent have the open well, and 6.3 percent have the piped water. A great number of both the urban (50.8%) and the rural (72.8%) areas use the pump. More of the urban households (26.6%) use the piped water than the rural households (1.5%). In the urban areas 19.7 percent of the households use the artesian well while in the rural areas 11.7 percent use it. The open well is used by 12.7 percent of the rural households and 2.5 percent of the urban households (Table 13).

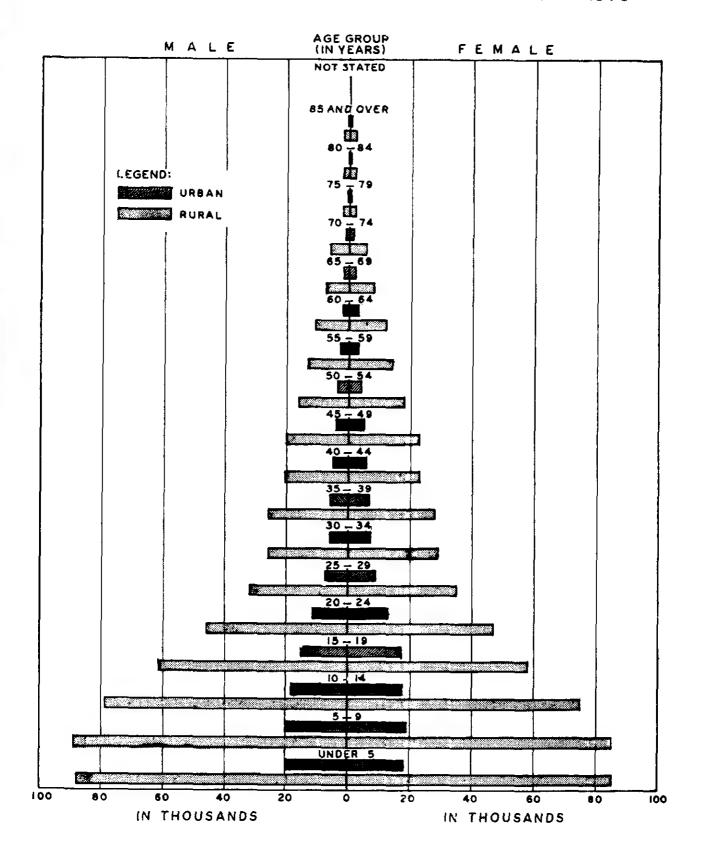

COOKING FUEL

Of the households in the province 89.3 percent use wood as cooking fuel, 4.6 percent use kerosene, 3.8 percent use gas (liquefied petroleum), and only 0.5 percent use electricity (Table 14). In the urban areas 74.3 percent use wood, while in the rural areas 92.9 percent use it. Gas (liquefied petroleum) is used by 12.2 percent of the urban households and only 1.8 percent of households in the urban areas and 3.2 percent of the households in the rural areas.

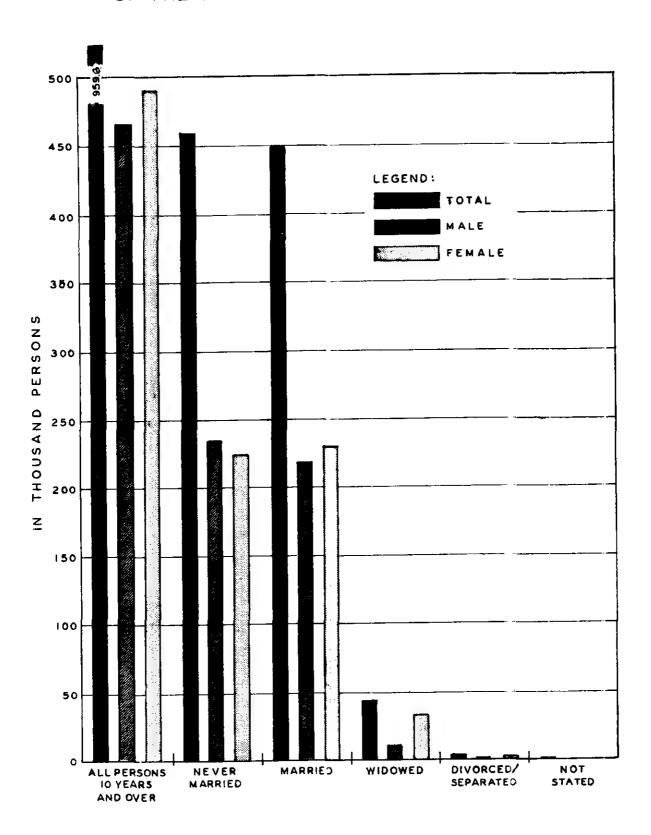

TOILET FACILITIES

Forty percent of the total number of households use the open pit; 22.1 percent, antipolo or closed pit; 20.2 percent, flushor water-sealed; and 0.9 percent use the public toilets. Households having no toilet facilities constitute 16.8 percent (Table 15). In the urban areas 38.4 percent use the flush or water-sealed; 27.5 percent, the antipolo or closed pit; 21.1 percent, the open pit; and 3.2 percent, the public toilets. In the rural areas 44.3 percent have the open pit; 20.9 percent, the antipolo or closed pit; 15.9 percent, the flush or water-sealed; and 0.4 percent, the public toilets. Households having no toilet facilities in the 'urban areas constitute 9.3 percent which is lower than that in the rural areas (18.5%).

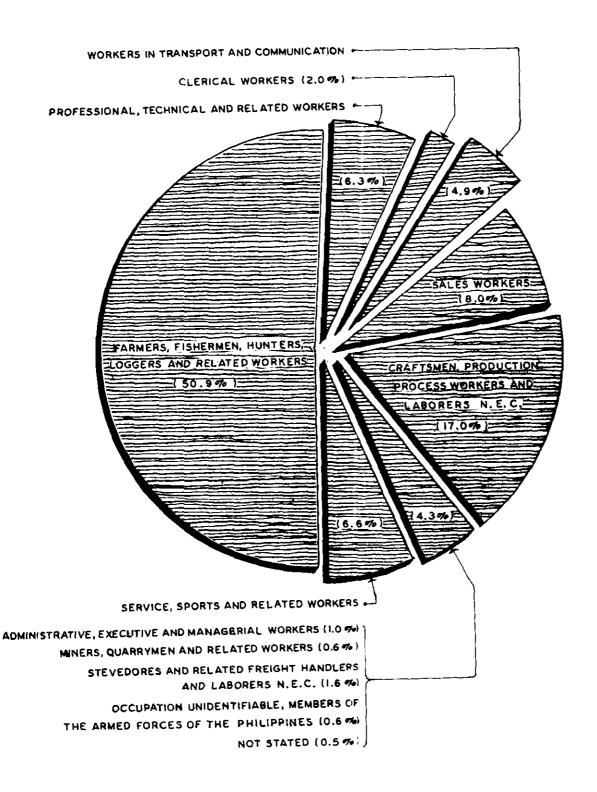

AGE-SEX COMPOSITION OF THE URBAN AND RURAL POPULATION OF THE PROVINCE OF PANGASINAN: 1970
